TRAININGS/CERTIFICATIONS:

1. Completed Python Full Stack Development certification at Pumo Technovation Institute

AREAS OF INTEREST:

1. Business Analysis
2. Web Development
3. Product Sales
4. Front-end Development

PROJECT DETAILS:

1. Traffic Analysis Attack for Identifying User Online Activities (UG Project)
Description: Goal of this project is to track any unauthorized access of an organization website and provide a dashboard to the IT team for necessary actions to be taken and reported to the Leadership team for decision making. I learned the types of cyber attacks and the preventive measures to be taken by the IT team and Organization.
2. Home Appliance Web Development (Institute Project)
Description: Project scope is to build an eCommerce search engine that can be plugged into any website for easy searching of any specific product as per the user requirement. Also developed dashboards for the users to generate views for their decision making.

3. Supermarket Billing System:(**Technologies Used: C# and SQL Server**)

The Supermarket Billing System is an application that automates the billing process in a supermarket. It handles tasks such as product scanning, price calculation, discounts, inventory updates, and invoice generation. The system ensures faster and more accurate billing, inventory management, and reporting for supermarket operations.

WORK EXPERIENCE:

INDUSIND BANK PVT. LTD.
